

*One of the most popular experiment.*

**Material:**

## Power of foam

Donnerstag, den 27. September 2012 um 16:00 Uhr

---

- bicarbonat.  
- wasser  
Instruction:

To the glass with vinegar and dishwashing liquid pour soda. Now violent reaction begins.

Solution is foaming now.

### Explanation:

It is deceptively simple: what appears to be one reaction is actually two, happening in quick succession. This reaction is an example of a multi-step reaction.
