

Physicsbook.gr is created to offer information about science for free. Next to our main topic "Experiment", we aim to offer information about, for example, famous scientists.

Many effects are named after the scientist, who explored them.

Lots of them got the Nobel Prize in their subjects and without their work, our globalized and technical world would not exist. Read about those Persons, who are responsible for the world you life in.

Many famous scientists were inspired by predecessors. So why not you?

We are looking forward reading your article about your Nobel Prize in a few years.
